Bogotá, Colombia

PROFESSIONAL SUMMARY

Full-Stack Java Developer with experience building web applications using Spring Boot, PostgreSQL, and JavaScript. I also work with Python for data analysis and machine learning, building pipelines, training models, and extracting insights from complex datasets. My background in civil engineering gives me a disciplined, analytical mindset: I enjoy validating data, debugging systems, and solving hard problems. Recently worked on LLM evaluation projects, strengthening my skills in prompt design and bias detection. Curious, self-taught, and passionate about learning new technologies.

WORK EXPERIENCE

LLM Trainer (Freelance)

May 2024 – Mar 2026

- Improved consistency and response quality in language models through prompt and dataset design and validation.
- Designed structured evaluation criteria that enabled reproducible results in technical tasks.
- Applied analytical and debugging logic to identify output errors and optimize results.
- Implemented responsible AI practices, helping reduce bias in training data.

Civil Engineer (Freelance)

Feb 2015 – Mar 2026

- Led technical, financial, and regulatory oversight for public infrastructure contracts including water treatment plants, rural aqueducts, urban roads, and public buildings for municipal and regional government entities.
- Served as Legal Representative, Municipal Controller, and Resident Engineer, ensuring contract compliance, budget control, and risk mitigation through field validation and audit-ready documentation.
- Managed a user cadastre and micro-metering program for utility operators, translating field data into actionable reports for billing, leak detection, and revenue recovery.

Bilingual Customer Support Representative – Teleperformance

October 2020 – June 2021

- Delivered resolution-focused support for Canada and U.S. clients, handling escalations and complex service inquiries.
- Strengthened communication skills in English for technical scenarios.

KEY PROJECTS

NordicStore | Personal Project | Full-Stack Developer

Jul 2026

- Built a microservices e-commerce platform with Spring Boot, Spring Cloud (Config Server, Eureka, API Gateway), OpenFeign, MongoDB, and PostgreSQL; secured with Keycloak (OAuth2/OIDC + JWT) using defense-in-depth validation.
- Developed an Angular SPA with OIDC/PKCE authentication covering the full purchase flow: catalog, cart, checkout, payment, and order history; containerized the stack with Docker Compose.

Style Factory | Generation Colombia | Full-Stack Developer

Feb 2026 – Jun 2026

- Developed a modular web application for service and booking management using JavaScript, HTML, CSS, Bootstrap, JAVA, Swagger, Render, Spring Boot, JWT, JPA.
- Implemented user authentication, session management, an administrative dashboard, and dynamic loading of reusable components.

Aurelion Guayerd Developer	Jul 2025 – Dec 2025
• Developed an end-to-end application that integrated business logic, exploratory analysis, data processing, and interactive visualization throughout the entire pipeline. • Trained and compared 9 regression and classification models using 5-fold cross-validation, achieving an R^2 of 0.99 with Random Forest on the test set and 88.4% accuracy for client segmentation. • Implemented K-Means clustering to identify 3 distinct client segments and built an automated documentation system within the data pipeline to ensure full traceability.	

Potenciar Solidario NGO Guayerd Data Analyst	Dec 2024 – Mar 2025
• Consolidated financial data from Excel (5 worksheets) and built an interactive Looker Studio dashboard integrating 1,138 transactions (610 donations, 528 expenses) from 140 donors and 150 vendors across 10 Latin American countries (2018–2024). • Analyzed \$190.3M ARS in donations and \$78.5M ARS in operating expenses, validating \$111.8M ARS net surplus and a 59% margin for stakeholder reporting. • Designed KPI views for revenue growth (+43% year over year, 2023–2024), geographic performance (Argentina, Uruguay, Brazil), and expense breakdown by account category.	

EDUCATION

Generation Colombia Full-Stack Java Development	Feb 2026 – Jun 2026
---	----------------------------

Guayerd / IBM Fundamentals of Artificial Intelligence and Data Analytics	Jul 2025 – Dec 2025
--	----------------------------

Cisco Networking Academy Network Support and Security	2023
---	-------------

Universidad de Caldas Programming Skills with an Emphasis on Web Development	2022
--	-------------

Universidad Pedagógica y Tecnológica de Colombia Environmental Engineering Specialist Civil Engineering	Jun 2014 - Jun 2015 Aug 2008 – Dec 2014
--	--

SKILLS

Java | Spring Boot | Spring Cloud | Microservices | REST APIs | OpenFeign | Keycloak | OAuth2 / OIDC / JWT | Angular | TypeScript | JavaScript | Node.js | HTML | CSS | SCSS | Bootstrap | SQL | PostgreSQL | MongoDB | Docker | Docker Compose | JPA | JUnit | Mockito | Swagger | Git | GitHub | CI/CD | Python | Power BI | Looker Studio | Excel | Render | Supabase | Cisco Networking | Cybersecurity
